Did you know that a man's obsession with his bike subtly shows the affection he demands from his woman?
Did you know that pink may not be a woman's favourite colour after all?
Did you know that men are not polygamous by nature?
Most importantly, did you know that each zodiac sign carries its own style of making love?
The book answers all of these and more, including how I balk at the pressure to get married only to realise that there are many more women like me who love their independence, space and regular infiltration of office workload.
It also reveals how men are not a confusing lot to understand. You just need to switch your brains on to understand prerogatives better. It unleashes the power hidden in the zodiac sign of your man to know if he is the answer to your prayers or you need to wait a little longer continuing the ritual of fasting on specific religious days for a perfect partner.
